<sup>1</sup> Native American includes American Indians and Alaska Natives.

<sup>2</sup> Other is defined as Asian Americans, Native Hawaiians, Pacific Islanders and all others.

<sup>3</sup> Two or more races indicates a person is included in more than one race group; it was introduced as a new category in the 2000 Census.

<sup>4</sup> Hispanic population is not a race but rather a description of ethnic origin; Hispanics are included in the five race groups.

NA = Not Available.

<sup>1</sup> Poverty is measured by using 48 thresholds that vary by family size and number of children within the family and age of householder. To determine whether a person is poor, one compares the total income of that person's family with the threshold appropriate for that family. If the total income is less than the threshold, then the person is considered poor, together with every member of his or her family. Institutionalized people, people in military quarters, people living in college dormitories, and unrelated individuals under 15 years old are excluded from the calculation of poverty rates.

<sup>2</sup> County ranking is the rank of Fulton County out of 67 counties within the state of Pennsylvania, with 1 being the best.

\*Reported cases per 100,000.

<sup>1</sup>Most cases of campylobacteriosis are associated with eating raw or undercooked poultry meat or from cross-contamination of other foods by these items.

Campylobacteriosis is an infectious disease caused by bacteria of the genus *Campylobacter*. Most people who become ill with campylobacteriosis get diarrhea, cramping, abdominal pain, and fever within 2-5 days after the exposure to the organism.
