¹ Poverty is measured by using 48 thresholds that vary by family size and number of children within the family and age of householder. To determine whether a person is poor, one compares the total income of that person's family with the threshold appropriate for that family. If the total income is less than the threshold, then the person is considered poor, together with every member of his or her family. Institutionalized people, people in military quarters, people living in college dormitories, and unrelated individuals under 15 years old are excluded from the calculation of poverty rates.

²Total Enrollment in Children's Medicaid is the total number of children in the following categories: TANF Children, Foster Care Children, Newborns, Children Age 1-5 and Children Age 6-14. The children in these categories qualify for Medicaid based on their age and family income.

³Total Children Under Age 19 Enrolled in Medicaid is the total number of Medicaid clients under the age of 19. There are people under age 19 who qualify for Medicaid for reasons other than age and family income. For example, a 17-year-old who is pregnant may qualify for Medicaid for "Pregnant Women" or a 16-year-old boy who is blind may qualify for Medicaid for "Disabled & Blind."
